Treadmill Isolation Mats

TM05 Mat

ECO-TEK
Sustainable Flooring Solutions

Manufactured with recycled rubber providing a durable isolation mat for gym equipment. The TM05 floor mat is designed for treadmills, and other types of gym equipment that create vibration and friction during use .

The isolation mat ensures that gym equipment is isolated to reduce impact sound and provides important protection, preventing the floor surface from damage. The mat also absorbs vibration, cushioning impact from the runner, making exercise more enjoyable. In addition, the mat provides a resilient platform for exercise.

TM05 Product Details

Size: 1000mm x 2000mm

Thickness: 5mm

Material: Recycled Rubber

Colour: Black

Rubber Flooring Technology

- Reduces impact noise and vibration from gym equipment
- Healthy antimicrobial surface
- Creates a safe exercise platform for users that reduces fatigue and injuries

Made from recycled rubber from used vehicle tyres, preventing these materials going into landfill, and creating a fully recyclable product which is kind to the environment.
